ABSTRACT

Artha Mukti Cooperative is a community economic movement as a business entity whose role is to create an advanced, just and prosperous society. Artha Mukti Cooperative is at JL. R.E. Djaelani (Mitra Mart Ruku Complex) Cilembang Cihideung Tasikmalaya City. The savings and loan unit process section still uses a paper form whose data collection process will take quite a bit of work time, besides that it tends to cause data to be lost or data to be damaged. Therefore, the author will develop a data collection system using a web-based database with HTML and PHP programming languages in program design using the waterfall method, which aims to make it easier for admins or workers at the Artha Mukti Cooperative to integrate member data so that it is safe, controlled. , and working time becomes effective.

Keywords: *System, Cooperative, Saving, Loan*
