Dear Mrs. Saucha Diwandari:

Congratulations - your paper #1570765436 ('Analysis of Customer Purchase Behavior using Association Rules in e-Shop') for 5th ICITISEE 2021 has been **accepted** and will be presented in the session titled __.

The reviews are below or can be found at https://www.edas.info/showPaper.php?m=1570765436.

Review 1

Relevance and timeliness: Rate the importance and timeliness of the topic addressed in the paper within its area of research.

Good (4)

Technical content and scientific rigour: Rate the technical content of the paper. (e.g. completeness of the analysis or simulation study, thoroughness of the treatise, accuracy of the models, etc), its soundness and scientific rigour.

Good (4)

Novelty and originality: Rate the novelty and originality of the ideas or results presented in the paper.

Good (4)

Quality of presentation: Rate the paper organization, the clearness of text and figures, the completeness and accuracy of references

Good (4)

Recommendation: How do you rate your recommendation?

Accept. (3)

Detailed comments: Please justify your recommendation and suggest improvements in technical content or presentation.

The authors should present data on the results of the model's accuracy assessment, such as overall accuracy.

Review 2

Relevance and timeliness: Rate the importance and timeliness of the topic addressed in the paper within its area of research.

Average (3)

Technical content and scientific rigour: Rate the technical content of the paper. (e.g. completeness of the analysis or simulation study, thoroughness of the treatise, accuracy of the models, etc), its soundness and scientific rigour.

Average (3)

Novelty and originality: Rate the novelty and originality of the ideas or results presented in the paper.

Average (3)

Quality of presentation: Rate the paper organization, the clearness of text and figures, the completeness and accuracy of references

Average (3)

Recommendation: How do you rate your recommendation?

Possible Accept. (2)

Detailed comments: Please justify your recommendation and suggest improvements in technical content or presentation.

- please describe the flow analysis process from your cases
- show a graph from the experiment result

Review 3

Relevance and timeliness: Rate the importance and timeliness of the topic addressed in the paper within its area of research.

Excellent (5)

Technical content and scientific rigour: Rate the technical content of the paper. (e.g. completeness of the analysis or simulation study, thoroughness of the treatise, accuracy of the models, etc), its soundness and scientific rigour.

Excellent (5)

Novelty and originality: Rate the novelty and originality of the ideas or results presented in the paper.

Good (4)

Quality of presentation: Rate the paper organization, the clearness of text and figures, the completeness and accuracy of references

Good (4)

Recommendation: How do you rate your recommendation?

Accept. (3)

Detailed comments: Please justify your recommendation and suggest improvements in technical content or presentation.

Thank you very much for giving me a chance to review the paper. I was enjoyed read the paper and I am having a little bit comment.

1. Abstract should be rewrite since the results of study need to rewrite... (structure: Motivation (problem statement), aims, methods, results, and recommendation).
2. Some grammatical errors found and need to proof editing before publication.

Regards,
Rizki Wahyudi

This email is a test message sent by the EDAS Conference Management system at https://edas.info/. The test was initiated by *Saucha Diwandari (Universitas Teknologi Yogyakarta).*

EDAS sends out test messages when somebody creates a new account for you, e.g., as a co-author, TPC member or reviewer, or when email delivery failed earlier. This ensures that the person can be reached by email.

No further action is required. We recommend that you add this sender address to your address book, as this will make it less likely that EDAS email will end up in your spam folder.
