ABSTRACT

Outlow studio is a company engaged in fashion which is located on Jl. Kapten Piere Tendean 59, Wirobrajan, Yogyakarta City, DIY. Outlow studio is a collective in which there is a shoe wash, haircut and clothes, accessories such as shoes, t-shirts, pants and much more. Outlow studio uses social media to market its products. In this sales system there are still some shortcomings where customers have difficulty in finding goods, availability of goods, Outlow studio wants to be able to increase the number of sales of goods in the future. From these problems, "Implementation of a Desktop-Based Goods Inventory System" was made which acts as a place to see available items, out of stock items and some available sizes in t-shirts and pants. In order for the implementation of storage of goods and warehouses to be managed and well organized, it is necessary to develop a system in the form of making an Inventory System.
