ABSTRACT

PT. BPRS Mitra Amal Mulia uses the method of collecting forms to calculate overtime pay for each employee, calculating employee payables, making salary recapitulation, and making salary slips for each employee. The attendance system itself requires employees to be present at the office, while those who work in the field must go back and forth so that it takes a long time. So that customers who want to pay debts do not meet with officers from the company. The method used is Payroll. Assist in accelerating the calculation of employee salaries to be faster and minimize the occurrence of errors. Facilitate attendance for employees working in the field. Facilitate employee data processing. Make it easier for employees to work and easy to receive salary and attendance reports.
