ABSTRACT

Legend Of Runetera is a video game made by Riot Games. This game is a TCG (Trading Cards Game) genre. Each match of this game consists of 2 players, then in the match both players will play cards that have been randomized by the system in the game and the two players will compete strategies with cards that will appear in each round. The creation of the Rune Master application is expected to make it easier for players to see the trend of the most effective cards or those with high wins and make it easier to see statistics on the Legend of Runetera game. Users of this application will also get a social interaction feature so that they can share their game experiences with each other in the Rune Master application. This application was built using the programming language PHP, HTML, and Javascript for the database here using MySQL. There are several applications for developing Rune Master applications, including Sublime Text Editor and WAMPP Server.

Keywords: *TCG, PHP, HTML, MySQL, Riot Games, Legend Of Runetera.*
