This study analyzes the idiomatic expressions in the 2017 movie, The Boss Baby. The writer of this study discusses three problems; 1) What are the types of idiomatic expressions found in the movie The Boss Baby? 2) What are the meanings of idiomatic expressions found in the movie The Boss Baby? 3) Which idiomatic expression dominates the data found in The Boss Baby? The data of the study were identified and described through the use of a descriptive qualitative method. The writer employed O'Dell and McCarthy's theory to classify and analyze the data. Based on O'Dell and McCarthy, idioms are divided into six types: similes, binomials, proverbs, euphemisms, clichés, and fixed statements. One hundred seven data found in the movie are included in the six types of idioms based on O'Dell and McCarthy's theory. The writer found 4 similes (4%), 2 binomials (2%), 2 proverbs (2%), 8 euphemisms (7%), 3 clichés (3%), and 88 fixed statements (82%) in the movie. Due to the repetition of the idioms, 30 examples are used to determine the meanings. The 30 data represent all six categories of idioms. The writer employed two methods, namely through the context of the movie and dictionaries, to explain the meaning. Fixed statements are found to be the dominating idiom in the movie.

Keywords: Idiomatic expression, movie, O'Dell and McCarthy

ABSTRAK

Aulia Kharisma. 2022. "*An Analysis of Idiomatic Expression Found in the Movie The Boss Baby (2017)*"

Penelitian ini menganalisis ekspresi idiomatik dalam film The Boss Baby tahun 2017. Penulis membahas tiga masalah; 1) Apa saja jenis ekspresi idiomatik yang ditemukan dalam film The Boss Baby? 2) Apa makna ekspresi idiomatik yang terdapat dalam film The Boss Baby? 3) Ekspresi idiomatik manakah yang paling mendominasi dari data yang ditemukan dalam film The Boss Baby? Data penelitian diidentifikasi dan dideskripsikan dengan menggunakan metode deskriptif kualitatif. Penulis menggunakan teori O'dell dan McCarthy untuk mengklasifikasikan dan menganalisis data. Berdasarkan O'dell dan McCarthy, idiom dibagi menjadi enam jenis, yaitu simile, binomial, proverb, eufemisme, klise, dan fixed statement. Terdapat 107 data yang ditemukan dalam film yang termasuk dalam enam jenis idiom dari teori O'dell dan McCarthy. Penulis menemukan 4 simile (4%), 2 binomial (2%), 2 proverb (2%), 8 eufemisme (7%), 3 klise (3%), dan 88 fixed statement (82%) di dalam film. Tiga puluh idiom digunakan sebagai sampel untuk menentukan artinya dikarenakan beberapa idiom bersifat repetisi. Tiga puluh data tersebut sudah merepresentasikan enam tipe idiom. Dua metode digunakan untuk memaparkan makna idiom, yaitu melalui konteks film dan kamus. Fixed statement ditetapkan menjadi idiom yang mendominasi dalam film.
