ABSTRACT

Nolkoma Coffee is located on Jl. Sidoromulyo No. 113, Kelengon, Tambahrejo, Bandar, Batang. The existing system at Nolkoma Coffee is still done manually where order recording is still done by hand and not computerized. Errors often occur in matching the stock of goods so that stocks often occur that are not recorded and cause material losses. This Web-Based Cashier Information System was built with the aim of facilitating the performance of employees and cafe owners so they can work effectively and efficiently. The writer's research method used is observation and interviews. The aim of the research is to design a Web-Based Cashier Information System and can facilitate Nolkoma Coffe in managing data on purchase transactions, sales transactions, sales return transactions and stock control. The result of this research is a Web-Based Cashier Information System that can simplify business processes that run at Nolkoma Coffee Batang.
