

ABSTRACT

CV. Yumeda Pangan Sejahtera is a cow's milk processing company located at Jl. Palagan Lempongsari block c no 18a, Sleman, Randuagung, Saringharjo, Ngaglik District, Sleman Regency, Special Region of Yogyakarta 55581. This company, which has been established since 2008, has various kinds of processed products including milk, ice cream, gelato and yoghurt. In carrying out its activities, CV. Yumeda Pangan Sejahtera with its Sweet Sundae brand does not yet use a web-based sales information system, where the process of recording product stock and products sold is still conventional, namely using MS Excel, in this process errors can occur in recording products sold which have an impact on not match between products that have been sold and remaining products. Therefore, it is proposed to apply the pieces framework method to a web-based sales information system. This web-based sales information system is expected to be able to assist in recording products sold, stock and viewing sales reports. The system built is equipped with a feature to view product sales reports, so it is easy to find out total product sales.
