ANALYSIS OF MANPOWER NEEDS IN PERSONNEL UNITS BASED ON WORKLOAD AT PKU MUHAMMADIYAH PETANAHAN HOSPITAL

Adiati Nur Latifah

Abstract

The number of employee needs must be based on the workload of the staff unit at the PKU Muhammadiyah Petanahan Hospital. To calculate the employee activity time that is used for work and the time that is not, the researcher uses a work sampling table. The method for calculating the need for manpower is based on the calculation of the workload approach per position according to MenPAN Decree Number: KEP/75/M.PAN/7/2004 concerning guidelines for Calculation of Employee Needs based on Workload. This study aims to determine the needs of employees in each work unit. The results of the analysis of this study indicate that the effective working day for employees is 296 days and the need for employees for companies is 11.
