ABSTRACT

Atmaadeva Game Center is a type of business that rents internet and computer services to the general public which was founded in October 2022. Internet Cafe is an internet service that sometimes requires you to queue first to use it due to limited availability. This causes customers to experience long waiting times. The implementation of a web-based internet cafe billing ordering information system is expected to be a solution to overcome problems in the computer ordering process. The billing ordering information system design was developed using problem identification methods, observation, interviews, data collection, literature study, data processing, system design, MySQL database and Laravel framework. The results of implementing the system design can display available and unavailable computers, and can be used by customers to make orders and choose computer booking hours according to the customer's wishes online.
