***Abstract***

*This research aims to analyze the influence of the reward system on the work motivation of SME employees in Sleman district. The sample collection technique used was purposive sampling with a total of 160 respondents. The data collection technique was carried out using an online questionnaire which had been tested for validity and reliability. The tests carried out in this research were descriptive analysis tests, instrument tests (validity and reliability tests), classical assumption tests (normality tests, linearity tests), coefficient of determination, and t tests. The results of this research show that the reward system has a positive and significant effect on employee work motivation.*
