ABSTRACT

The increasing use of gadgets and awareness of health, especially among students, has encouraged the creation of an Android-based Health Care Consultation Service Simulation Application. The Android-based Health Care Consultation Service Simulation Application is an E-Health application service in the Health sector created specifically for students who operate through applications. The problem in this case is helping students who may be really sick and cannot go straight to the doctor for treatment so that it is easier to get a prescription from the doctor. The results of this research are in the form of Consultation application to get a doctor's prescription.
