## **ABSTRACT**

*According to data from the Central Statistics Agency (BPS) as of February 2022, it shows that 59 percent of the working-age population between 15 – 29 years old is unemployed. For developing countries like Indonesia. Unemployment causes people's welfare and prosperity to decline, economic growth slows, and state tax revenues decrease. The difficulty of getting a suitable job is a problem that often occurs in big cities. For developing countries like Indonesia. Unemployment causes people's welfare and prosperity to decline, economic growth slows, and state tax revenues decrease. The difficulty of getting a suitable job is a problem that often occurs in big cities. Therefore, a medium is needed that makes it easier for job seekers to receive information on the availability of vacancies and facilitate the application process. The creation of this media is applied in smartphone devices. With this application, users can see job vacancy information and mark job vacancies that users find interesting and in accordance with user abilities.*
