ABSTRACT

CV Outline Creative Media is a company operating in the digital printing and advertising sector. Since its formation in 2013, CV Outline Creative Media has participated in supporting the Indonesian creative industry. Currently, the Outline Digital Printing ordering process is carried out by customers coming to the office, contacting them by telephone, or customers who want to know about the price of any product must come directly to the office or by telephone. Based on these problems, the author created a mobile-based ordering application. The system built can make orders via mobile. The system was built using the Flutter programming language. With the system built, customers can easily find out product information and place orders.

Keywords: Digital Printing Ordering System, flutter, Mobile.
