TRAINING ANALYSIS OF EMPLOYEE AT PDAM TIRTA HANDAYANI GUNUNGKIDUL

Ramadhan Wahyu Syah Putra

Abstract

This study aims to ascertain and examine the employee training program at PDAM Tirta Handayani Gunungkidul. The research method employed is a quantitative descriptive approach, which involves the distribution of a questionnaire and the subsequent analysis using SPSS Statistics 25 software. The findings reveal that the aggregate mean value of the training indicators is 3.46, falling within the “strongly agree” category (SS). The study’s findings indicate that the employee training program implemented by PDAM Tirta Handayani Gunungkidul has been effective. The lowest average value recorded was 2.98, which was observed in the curriculum indicator, while the highest average value was 3.70, which was recorded in the development fund indicator.
