This study aims to determine the performance of local revenue and expenditure budget at Yogyakarta Environment and Forestry Department. The data used in this study were budget realization reports in the fiscal year 2017-2018. This research was a descriptive statistic using: (1) analysis performance of the local revenue consisting of effectiveness revenue analysis and revenue growth, (2) analysis of regional expenditure performance includes: variance analysis of regional expenditure, analysis of regional expenditure activity, and analysis of regional expenditure efficiency. The results of the analysis showed that the performance of regional budget revenues expenditure of Environment and Forestry Department considered as good performance. It was shown by (1) the ratio of the effectiveness of PAD included in the category of sufficient and (2) PAD growth included in the category of positive growth. Meanwhile, the performance analysis of the regional expenditure showed: (1) variance expenditure analysis was considered good because the realization did not exceed what budgeted. (2) analysis of growth in expenditure was negative because it has decreased. (3) the ratio of expenditure was rated well while capital expenditure is considered less fit because Environment and Forestry Department prioritized its budget for operational expenditure than capital expenditure. (4) efficiency analysis of expenditure was rated efficient.
