**Abstrak**

Penelitian ini bertujuan untuk mengetahui pengaruh pelatihan keterampilan kerja terhadap minat berwirausaha peserta pelatihan pada UPT Balai Latihan Kerja Dinas Tenaga Kerja dan Transmigrasi Kabupaten Kulon Progo. Penelitian ini dilakukan pada bulan Maret sampai dengan April 2019. Metode pengumpulan data yang digunakan adalah kuesioner. Dengan pengambilan sampel yaitu menggunakan metode *Probability sampling*. Teknik analisis data yang digunakan adalah analisis deskriptif menggunakan uji instrumen penelitian, uji asumsi klasik, uji regresi linear sederhana, uji t, dan analisis rata-rata hitung. Hasil penelitian ini menunjukkan bahwa Pelatihan Keterampilan Kerja mempunyai pengaruh positif dan signifikan terhadap Minat Berwirausaha dengan koefisien regresi yang diperoleh  $a = 3,071$  dan  $b = 0,845$ . Berdasarkan hasil uji t, diketahui bahwa nilai *coefficients* regresi variabel Pelatihan Keterampilan Kerja (X) adalah sebesar 0,845 bernilai positif. Dan berdasarkan hasil uji koefisien determinasi diketahui bahwa nilai R Square ( $R^2$ ) adalah sebesar 0,709 (71,4%). Hal ini berarti bahwa sebesar 0,714 dari variabel Pelatihan Keterampilan Kerja (X) dapat mempengaruhi variabel Minat Berwirausaha (Y), sedangkan sisanya 28,6% dipengaruhi oleh variabel lain yang tidak diteliti pada penelitian ini.

***Kata Kunci:*** *Pelatihan Keterampilan Kerja dan Minat Berwirausaha*

**THE EFFECT OF JOB SKILLS TRAINING ON THE INTEREST IN  
ENTREPRENEURSHIP OF TRAINING PARTICIPANTS IN  
UPT TRAINING CENTER DEPARTEMENT OF  
MANPOWER AND TRANSMIGRATION  
KULON PROGO REGENCY**

***Abstract***

*This Study aims to know the effect of job skills training on the interest in entrepreneurship of training participants in UPT Training Center Department of Manpower and Transmigration Kulon Progo Regency. This research performed in March until April 2019. Method of collecting data used a questionnaire. Sampling uses probability sampling method, where the sampling are selected randomly. In this sampling all members of the population are assumed to have the same opportunity to be chosen as the research sample. While the data analysis techniques used are descriptive analysis, research instrument test, classic assumption test, simple linear regression test, t test and analysis of average count. The research shows that job skill training has a positive and significant influence on the interest in entrepreneurship with the regression coefficient obtained is  $a = 3,071$  dan  $b = 0,845$ . Based on the result of the t test, it is known that the value of the regression coefficients for variabel job skill training (X) is equal to 0,845 which is positive value. And based on the test result the coefficient of determination it is known that the value of R is equal to 0,709 (71,4%). This means that as much as 0,714 from the variable job skill training (X) can affect the variable interest in entrepreneurship (Y), while the rest 28,6% influenced by other variables not examined in this study.*
