This report aims to find out the business licensing process via Online Single Submission (OSS) on DPMPT. The implementation of business licensing is carried out by business actor as a applicant, customer service, service and information sector, as well as the field of data collection and stipulation. The business licensing process is carried out via Online Single Submission (OSS), namely business actors registering with an online system, receipt and checking of business actors' files by customer service, file evaluation by service and information fields, as well as data collection and licensing by the field of data collection and stipulation. According to the results of observations and discussions, the obstacle faced by employees, especially the customer service section is the lack of understanding of the OSS system. Therefore, Online Single Submission (OSS) institutions provide training for employees in the investment service and integrated services, especially the customer service department. The writing method used by the author in preparing this final project report is observation and literature study.
