

## **ABSTRACT**

*SMA Negeri 1 Minggir is a senior high school located at Pakeran, Minggir, Sleman, Yogyakarta, which is led by Drs. Dahari M.Pd. Its learning-teaching activities are conducted conventionally like other schools; teachers provide learning material in softcopy and hardcopy form. Hardcopy is usually in the form of photocopies of material, notes and from textbooks. Based on these activities, students seems to become bored because these activities are carried out continuously; there is no innovation provided by the teacher during learning-teaching process. It means the material conveyed is not optimal. The system created was e-learning which assisted in the process of Indonesian language learning activities, the process of providing material between teachers and students. The e-learning system implemented in SMA Negeri 1 Minggir only for class X. Teacher provided material through e-learning. In E-learning, there are discussion facilities and online quizzes. The system development method used was observation, interviews, and literature studies.*
