

ABSTRACT

Miftahunnajah Islamic Boarding School (M-IBS) is an educational institution under Pelita Umat Yogyakarta Foundation. This boarding school was initiated by Ustadz Didik Purwodarsono as the founder of Pelita Umat foundation and established in mid-December 2009. Mostly, the pioneers of Miftahunnajah Islamic Boarding School were alumni of the Takwinul Muballighin Islamic Boarding School. The founder team were Muahamad Mujari, S.T., Kustriyanto, S.Sos.I, Ibnu Asakir, S.Pd, Pradana Kurniawan, S.Pd, Heri Purnomo, S.Pd.I. M-IBS is located in Trini, Trihanggo, Gamping District, Sleman Regency, Special Region of Yogyakarta. This boarding school puts forward students to memorize the Qur'an. Many students who have just entered the boarding school do not have Qur'an memorization. Dating process underwent constraints and limitations, including the absence of an integrated system with a database in the management of students' memorization data, which has led to the accumulation of archiving documents. In designing and building a rote data collection system the researcher used the software of Visual Studio Code, MySQL Database, Xampp, and Phpmyadmin. With this Al-Qur'an memorization data collection system, it is required to make it easier for agencies to store documents related to this information system.
