

ABSTRACT

The River Edge Teachers Association (P3S) is a free joint learning forum for young people in Yogyakarta. The association has 4 separate areas, namely, Sendowo, KarangJati, Blunyah and Karangwaru. The teaching volunteers who are members of P3S come from various universities. Every year, P3S continues to recruit to screen new volunteers. Therefore, it is hoped that the design of this volunteer management information system can help in seeing the presence of volunteers who are present to teach web-based. In addition, this system can also make it easier for volunteers to convey criticism and suggestions.
