# ABSTRACT

*The "Cinta Maju" Savings and Loan Cooperative in Maja District is a business that is engaged in savings and loans. The "Cinta Maju" Savings and Loans Cooperative was founded on November 21, 2006. The "Cinta Maju" Savings and Loan Cooperative serves savings and loans. The purpose of writing and compiling this final project is to build an information system for the online-based "Cinta Maju" savings and loan cooperative, so that transactions and reports can be done online and makes it easier for members to get information on savings and loans without having to come to the cooperative management. The programming languages used are PHP, CSS and HTML and MySQL database. The result of this research is that the application can be done online. In addition to making it easier for members to access information, it also increases effectiveness and efficiency, because there is a data processing system carried out by administrators.*

*Keywords: information systems, savings and loan cooperatives, PHP and MySQL.*
