

## **ABSTRACT**

*My Koma is a large-scale beverage company located in Yogyakarta. This company has several branches in Indonesia, especially Yogyakarta. The current problem at My Koma Yogyakarta warehouse is that the company registers incoming and outgoing items still using a non-computerized system, so it takes a lot of time to find out the existing stock of goods. This company has business process problems that are very vulnerable to goods to be sold, such as the expiry time of goods and storage that is too long will result in damage to goods. The need for accuracy of recording and calculation on the Inventory to make a good management plan. Therefore, the researcher wants to create an information system entitled Design and Development of a Web-Based Goods Inventory Information System so that the overall asset / item management transactions can be recorded systematically.*
