

## **ABSTRACT**

*Coffee 90'S is a medium-scale business entity engaged in the culinary field. Coffee 90'S is located at Grand Galaxy Park RSA 2 No. 67, Jakasetia, South Bekasi, Bekasi City. So far, Coffee 90's managers are still taking orders, on a piece of paper. Losing a sheet of paper will have an impact on not meeting consumer demand and will worsen service. This food menu ordering application uses a PC (Personal Computer) in the kitchen or cashier server, and in the consumer or service section uses a mobile android as a client. The programming language used in making this application is the Java programming language. The existence of an android application that can support in running the food and beverage ordering system easily and simplifies the calculation of total customer payments. With a retail system, employees are no longer constrained by the results of their daily sales reports efficiently. The presentation of information in client-server form makes it easy for Coffee 90's owners to check anytime.*
