

ABSTRACT

The tourism sector currently has the potential to be developed as a source of regional income by utilizing resources that can contribute to multidimensional economic development. Yogyakarta is directly adjacent to the southern part of Central Java province. Yogyakarta has many interesting tourist attractions so that it is one of the tourist destinations in Indonesia which is visited by many local tourists and foreign tourists. Yogyakarta City Tourism attractions are natural tourism objects, temples, ancient relics, arts centers, and craft centers. To make it easier for tourists to choose tourist attractions in Yogyakarta, a Tourist Mapping System in the city of Yogyakarta is needed using WebGIS. With this system, data can be processed by displaying the right tourist attractions for users and making it easier for users to get information on tourist attractions.

Keywords: WebGIS, Tourism, Yogyakarta City.
