

ABSTRACT

Payment gateway is a payment system that can make it easier for sellers and buyers to make transactions. E-commerce or so-called electronic commerce is the distribution, purchase, sale, marketing of goods and services via the internet or computer networks. Cahaya Laptop is a company engaged in the sale of computers and accessories, services, hardware, which is located on Jl. Jembatan Merah no.4 Prayan Wetan, Condong chess, Depok, Sleman, Yogyakarta. This company is a new company in Yogyakarta. The company Cahaya Laptop still uses a conventional sales system, where buying and selling transactions are made by coming directly to the store. So far, "Cahaya laptop" still uses promotional media through Facebook and Instagram fanspages. In addition, online orders are made by contacting directly via Whatsapp. The difficulty experienced when online ordering is made via Whatsapp, namely determining shipping costs and consumers having to wait for a response from Cahaya Laptop. Seeing these problems, the authors are interested in solving the problems that exist in this final project by creating an e-commerce application that can help the management of Cahaya Laptop. The system that has been created is able to make it easier for employees to process transaction data so that it can make it easier for customers to make computer product transactions without having to come directly to the seller.

Keywords: E-commerce, Payment gateway, sales system.
