1.   ABSTRACT

CV. Salam Wisata Tour & Travel is a tour and travel agencies in Sunggingan, Sragen, Central Java. So far, CV. Salam Wisata Tour & Travel does not yet have a website for booking tour packages that they offer. Making a tour package booking website with a payment gateway system is intended to make it easier for customers to order tour packages and make payment orders, and administrators manage tour package data, reservations, and finances.

Designing a tour package booking system has four stages: Needs Analysis, System Design, System Implementation, System Testing. The data used in this study is the original data obtained from CV. Salam Wisata Tour & Travel consists of tourist attraction data, price data, payment data, booking data, customer data, company profiles, travel data and monthly reports.

The results of this study are in the form of a tour package booking system with payment gateway payments that can assist companies in managing tour package reservations, managing reports. Make it easy for customers to find tour package information at CV. Salam Wisata Tour & Travel, make tour package reservations and direct payments through the Midtrans payment gateway.

Keywords: Booking, Tour Packages, Payment Gateway, Midtrans, Tour & Travel
