ABSTRACT

Web-Based Student Value Management Information System is a system that provides online student activity reports in the form of student grade reports and relevant information, thus helping the quality and speed of information delivery. The problems that occur in processing report cards for SMA 1 Minggir are still conventional, which are written in report cards, in managing grades it takes a lot of time and effort, causing many problems. This study aims to develop an information system that makes it easier to check grades, record and report student grades in a systematized manner, as well as web-based grade information that can be accessed at any time. The system display is implemented in accordance with the existing report cards so that the system can be used easily and produces accurate value calculations.
