ABSTRACT

This research is motivated by the number of schools that implement online learning systems in their respective homes due to the global pandemic. So that teachers need a way to keep filling in grades to students so that they can fulfill the assessment column of the learning process every day, as well as efforts to improve services to guardians of students in Kindergarten and Tiara Nusa Playgroups in an effort to be closer to parents even though they don't meet directly. A system is needed that can provide a daily student assignment reporting feature. Based on these problems, it is necessary to have an Early Childhood Education Student Learning and Assessment Information System that can provide facilities for sending assignments and information in the form of children's grades based on the tasks given, children's development based on skills in completing assignments, as well as announcements regarding other matters. related to administration and other academic schedules. With the Learning and Assessment Information System for Early Childhood Education, it is hoped that it can help parents in sending assignments and seeing the progress of children's assessments based on assignments that have been given by the teacher.
