## ABSTRACT

*Kieraha Tour and Event Management is a travel agent and transportation provider based in the Special Region of Yogyakarta. Kieraha Tour and Event Management formed three divisions, namely Kieraha Tour and Travel, Kieraha Event Management, and Kieraha Car Rental. In this case the object of research is Kieraha Car Rental. Administration at Kieraha Car Rental includes managing data, processing transactions to managing reports which are only stored in excel files. As for the management of car rental administrative data that has not been integrated, so that when the data is needed, the time used is also quite long. Therefore, a web-based car rental administration information system was created. It aims to be able to facilitate the process of managing car rental administrative data to recording reports. Consumers can see the cars for rent along with the details offered. In addition, Kieraha management can manage car rental administrative data more effectively and efficiently.*
