ABSTRACT

This research intend to solve a study payment problem in jepunsari english club that still have conventional system. The payment system that is currently running makes the recording of student payment administration data inefficien. It causes several shortcomings such as inefficient payment and uncoordinated registration of tuition fees. Payment gateway is a payment system that is very efficientto use as a transaction in any field, so it is very helpful for fast and efficient transaction processing. In the process of making this payment system The system will be have some features like register student data, payment student data and student data. It will help both of jepunsari and their student to make easier transaction in an institution.
