

ABSTRACT

PT. Narada Katiga Indonesia (NKI) is an occupational safety and health service company. The company has been registered by the Ministry of Manpower of the Republic of Indonesia and is committed to improving customer competencies regarding health and safety in all industries. PT. Narada Katiga Indonesia (NKI) is located at Taman Gejayan 02 RT 06 RW 35 Prayan Wetan Kaliwaru Condongcatur, Depok, Sleman. PT. Narada Katiga Indonesia (NKI) always prioritizes quality training to meet customer satisfaction. The company provides training concepts and materials that are always adapted to industry developments and laws through experienced and professional instructors, so that the goal of creating effective health and safety management in the work environment can be achieved. The K3 training system has several problem formulations in the form of a system that will display a list of K3 training for visitors, the system can serve orders for participants in carrying out K3 training and the system can serve payments made by K3 training participants. For the scope of the problem limitation, the author defines the presentation of training information for participants who will attend K3 training and the system can serve participant orders and participant payments in real time which will inform participants about orders and payments via email. The purpose of creating a K3 training participant service system includes presenting appropriate information for K3 training visitors, to facilitate participant services in ordering and paying for K3 training.

Keywords: K3 training, system, effective.
