ABSTRACT

CV.Archio is a store located in Central Klaten which is engaged in retail ink and printer sales. The purpose of writing this Final Project is to produce a web site design that can help increase the owner's income and time efficiency in delivering information needed by consumers. In designing an e-commerce information system for selling goods based on a web that uses a database so as to simplify and speed up the process of sales transactions at CV.Archio. The writing method used is the Waterfall method, and is built with the PHP programming language and for data using My SQL. This application can help market products and provide all information about goods available through the internet to consumers.

Keywords: *Information System, Sales, PHP, MySQL*
